# About COMPANY

Introduction Digital Bhajan Networks (DBN) is a dynamic information technology company (ICT) dedicated to providing end -to -end technology solutions in various industries. Built on the basis of innovation, integrity and excellence, DBN has positioned itself as a reliable Trust IT partner. From server infrastructure and network to cloud services, personalized software and mobile applications, DBN is equipped to meet the constant digital demands of public and private clients. Our commitment lies in providing scalable, secure and ready -made solutions to the future that enable organizations through digital transformation

# VISION

---

To be recognized as a leading strength in the ICT industry, and put benchmarks in technological skill, service delivery and customer success.

# MISSION

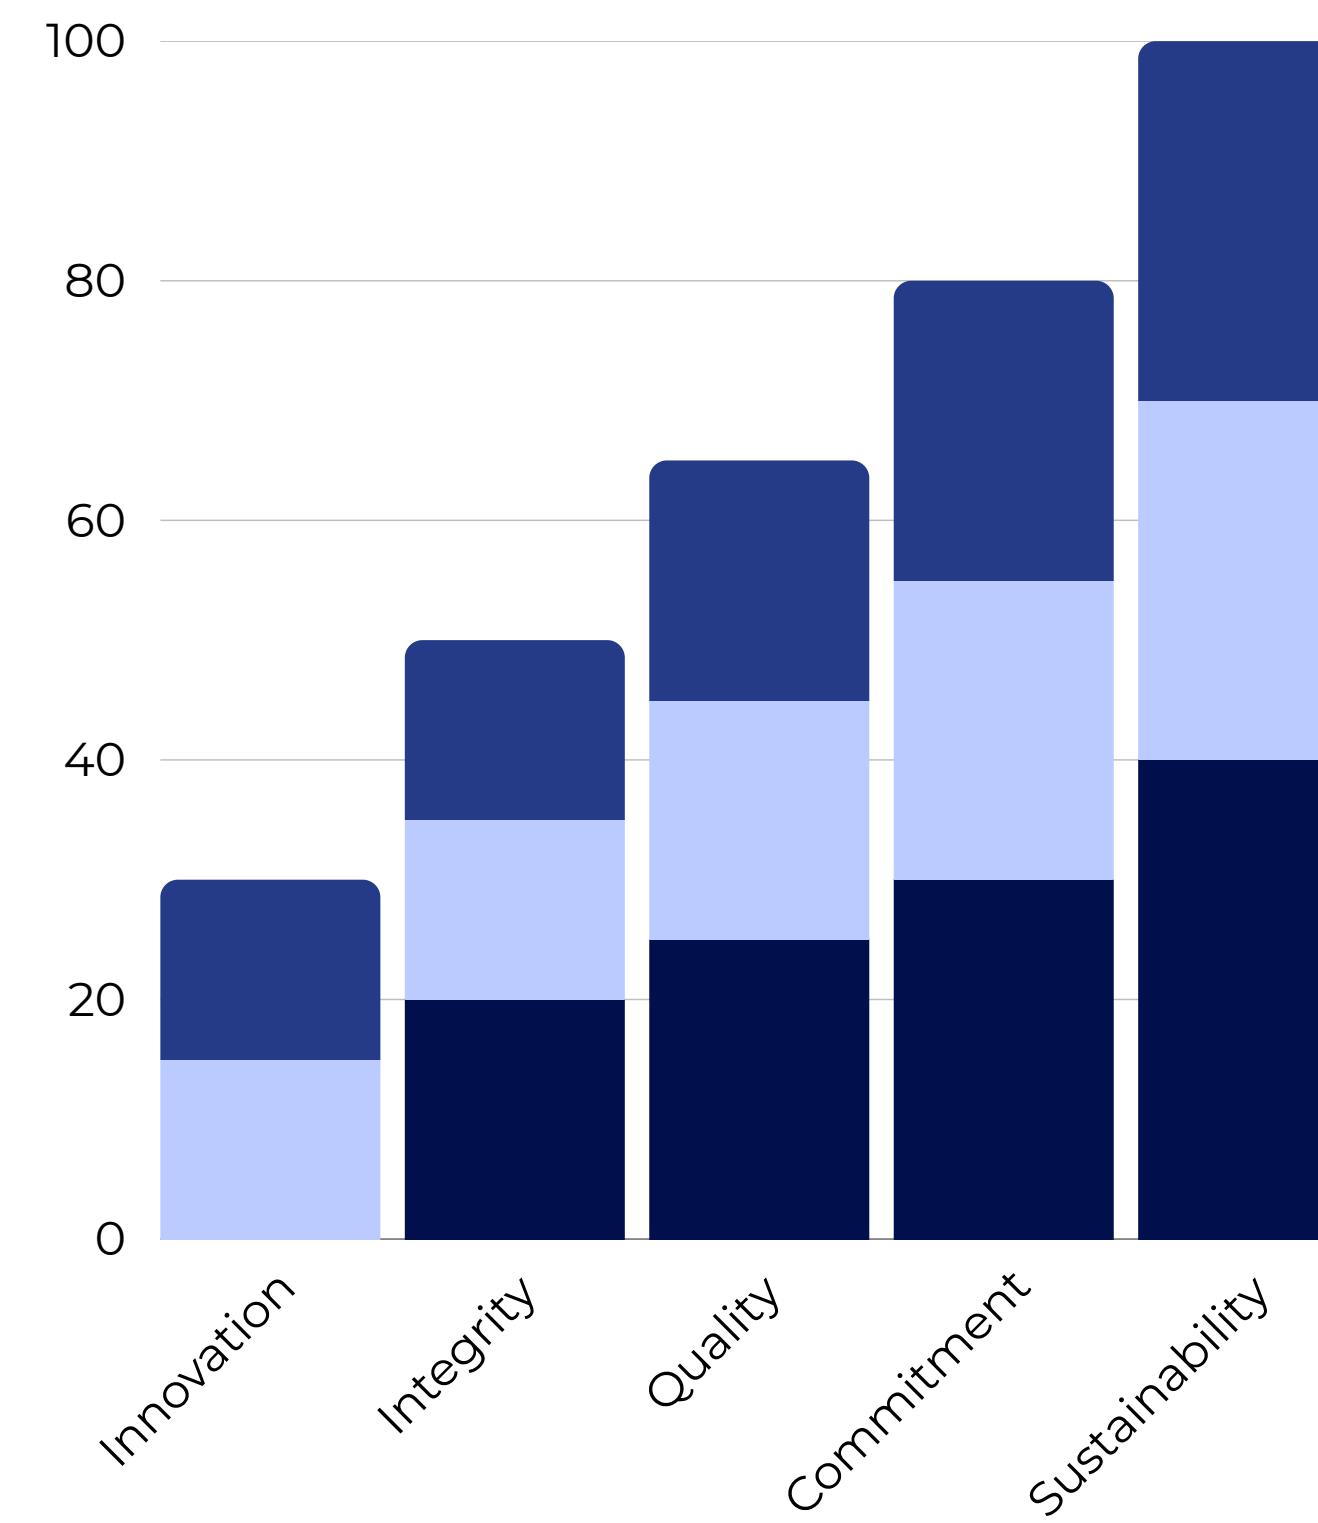

- To strengthen organizations through innovative Biomedical Technology & IT solutions, enabling seamless digital transformation with a strong focus on quality, reliability and customer-centric innovation.

# CORE VALUES

---

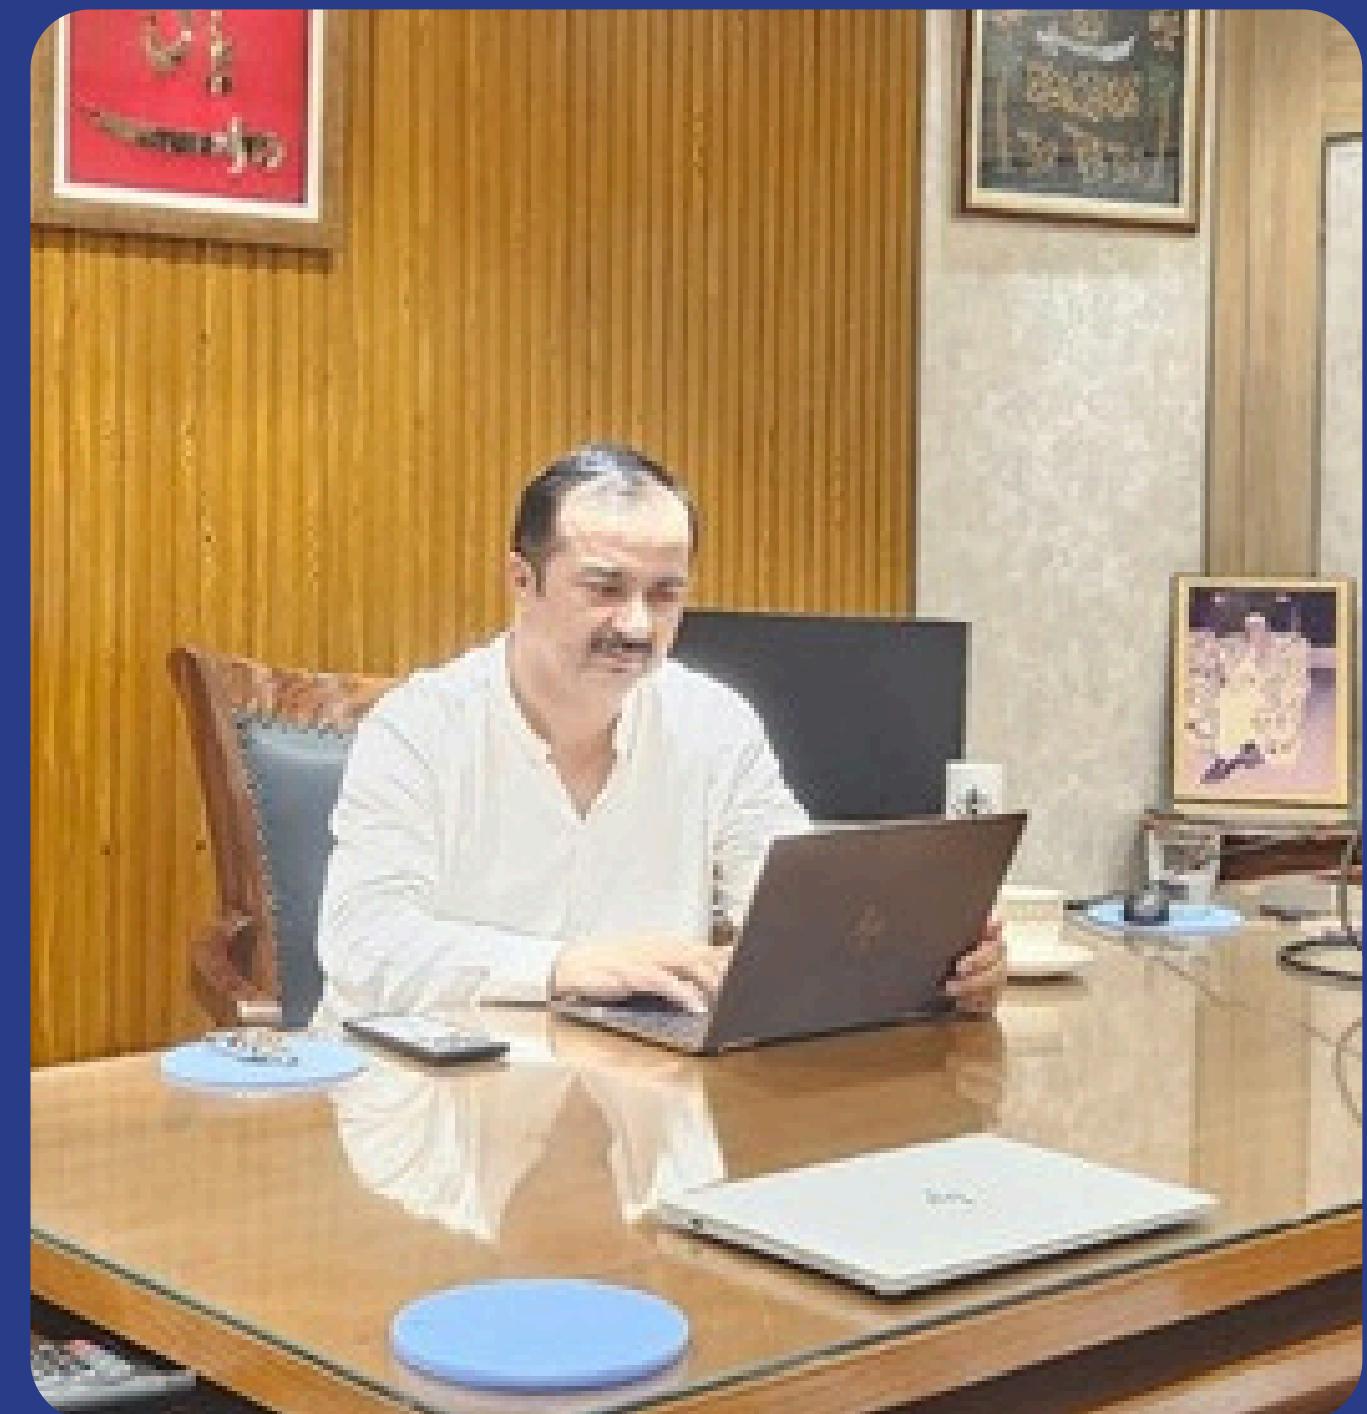

- **Innovation** – To run creative and Future clear solutions
- **Integrity** – Maintain openness and trust in each commitment.
- **Quality** – Obliged to deliver service expertise.
- **Commitment** – Dedicated to long-term partnerships and client growth.
- **Sustainability** – To provide environmentally friendly, future-proof technologies.

# Leadership Message

Our deepest appreciation goes to ALMIGHTY ALLAH for the innumerable blessings He has showered on us. This journey has been adorned with values of service, integrity, and steadfast commitment to unmatched excellence. Starting off as a medical supply and monitoring technology firm, we have now evolved into a multidisciplinary solutions provider, serving various sectors such as healthcare, water, energy, environmental sciences, and IT. This has only been possible with the trust and loyalty of our clients and the strength of our dedicated, hardworking team. We look forward to sustaining this journey of impact and excellence alongside all of you. This way, we will be able to make a difference through the continued investment in innovation, human capital, and ethical business practices, owing to society and the environment.

Warm Regards:  
KAMRAN HYDER MEMON  
Managing Director.

# CORE SERVICES

---

- Biomedical Technology & Laboratory Equipment Division.
- DSS (Decision Support Systems) Centers Setup.
- Server Infrastructure & Server Room Setup.
- ICT Turnkey Solutions.
- Hardware Solutions
- Software Solutions
- Networking Services
- Data Management
- QR-Based Mobile Applications
- Cloud Computing
- IT Equipment Supply & Support
- Web Development

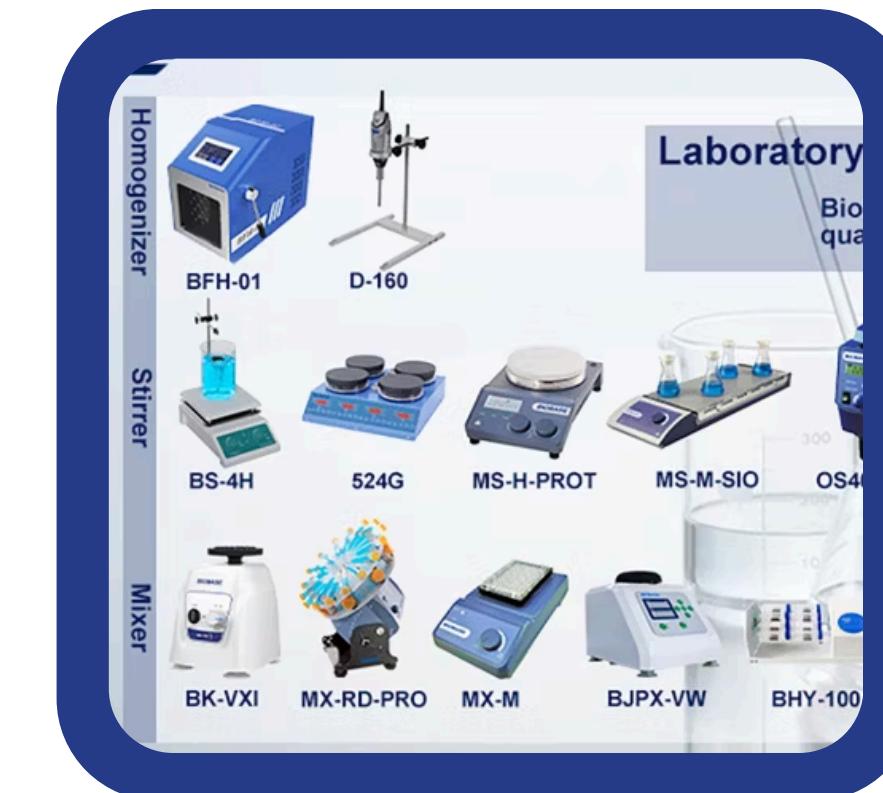

# Biomedical Technology & Laboratory Equipment Division.

1

**Biomedical Solutions:** Supply and service of advanced diagnostic and laboratory equipment, including PCR systems, centrifuges, spectrophotometers, and biosafety cabinets.

.

**Laboratory Infrastructure:** Design and setup of complete molecular, microbiology, and clinical labs to global standards.

2

Design and implementation of high-performance DSS environments.

Real-time data analytics and decision-making to respond to disasters, governance, and planning.

# DSS(Decision Support Systems) Centers Setup

# Server Infrastructure & Server Room Setup

3

- Implementation of safe and scalable server solutions.
- Professional server room design, including power management, cooling, rack installation, and access control.

**4**

- Complete ICT deployment: structured cabling, network, cyber security and software integration.
- Perfect implementation from infrastructure to software delivery.

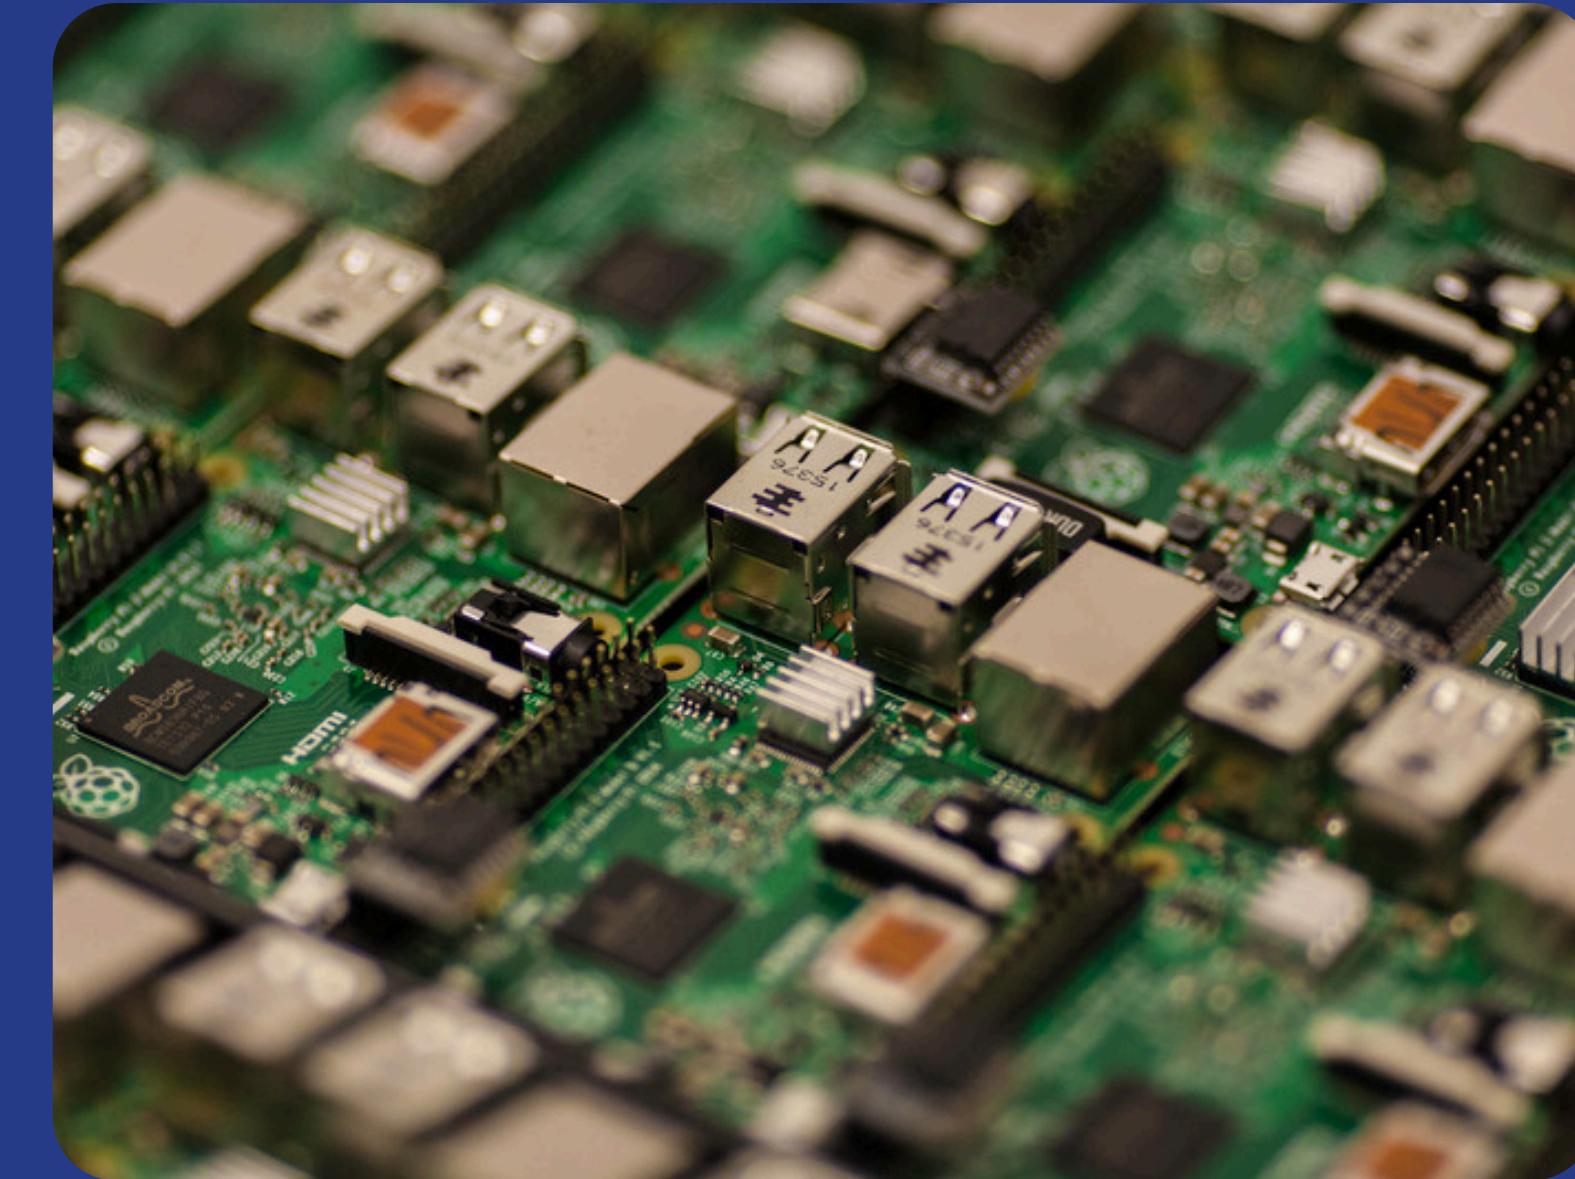

# ICT Turnkey Solutions

# Hardware Solutions

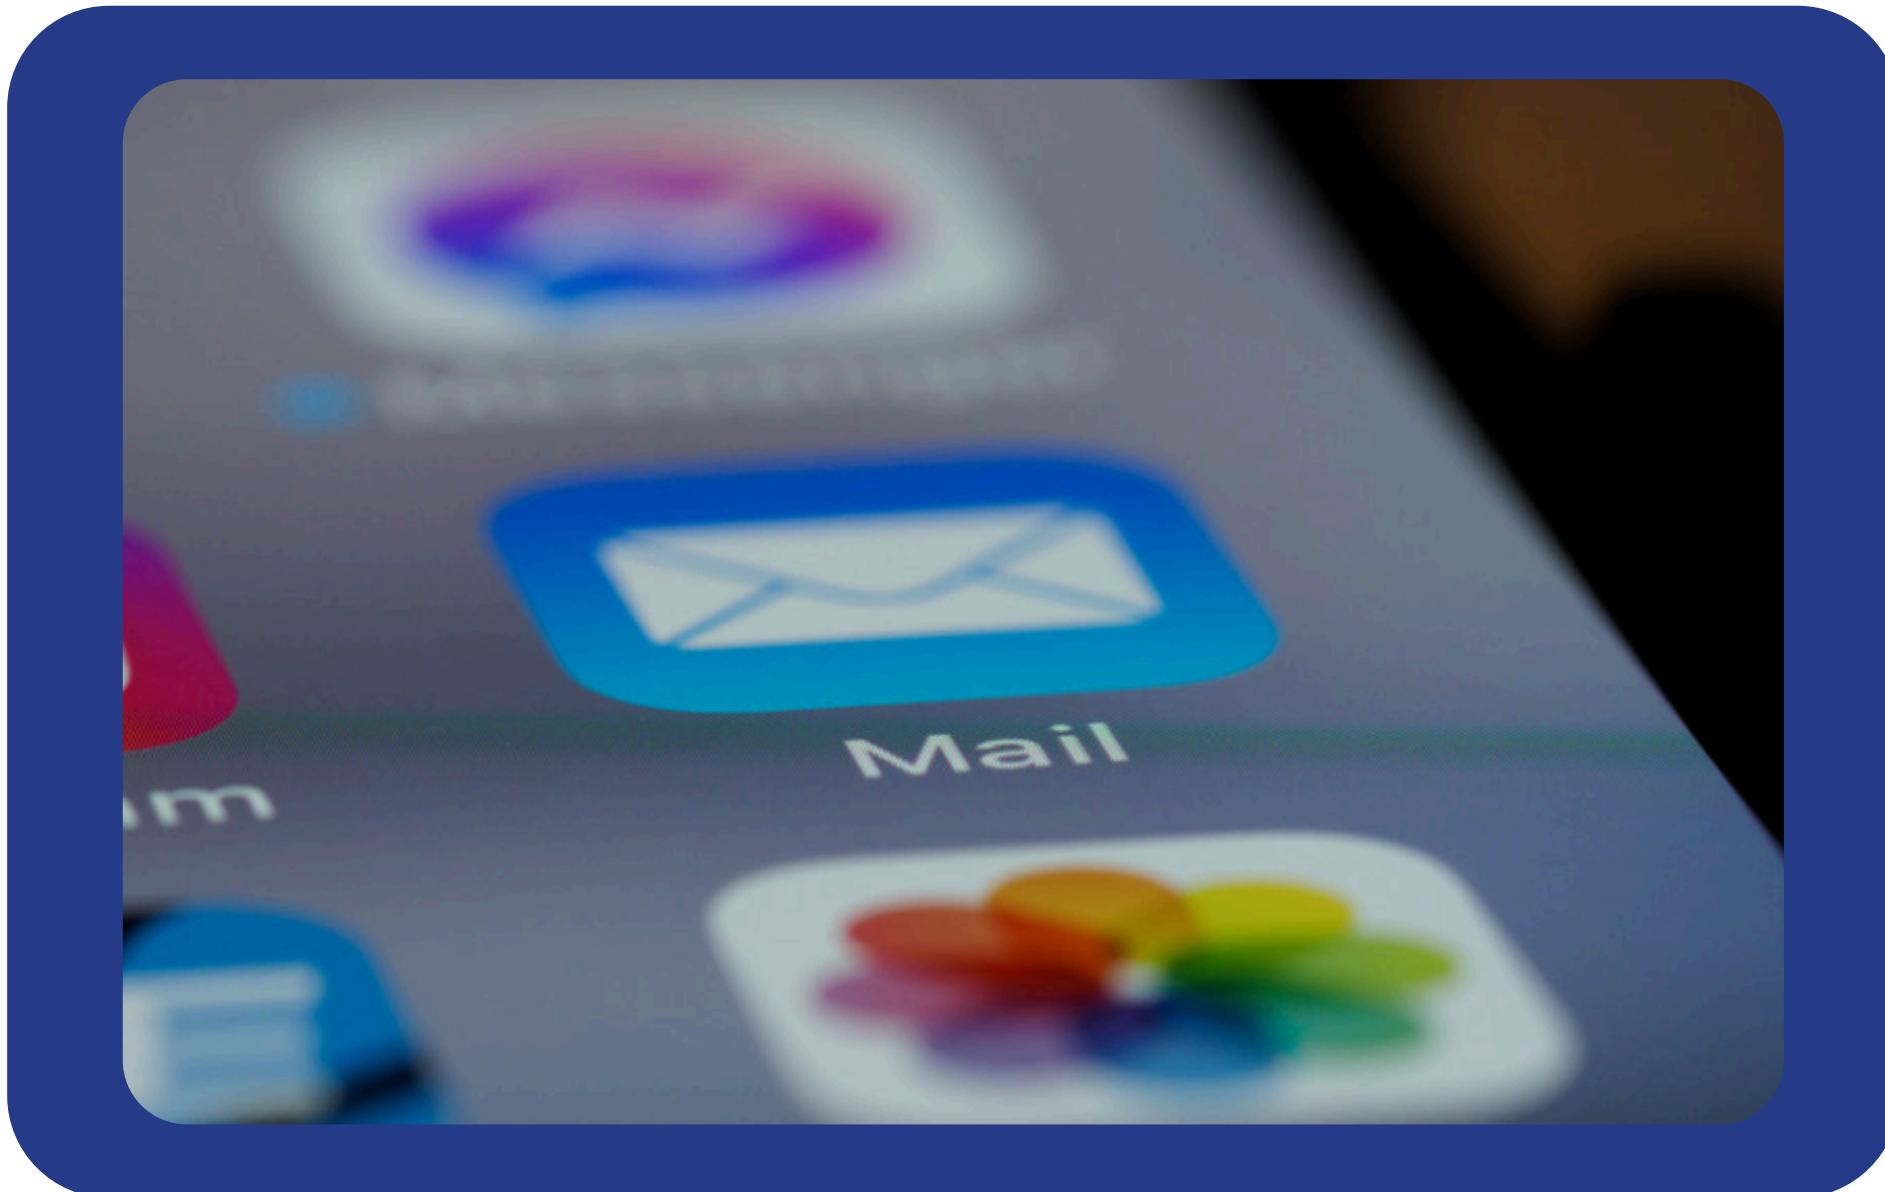

5

- Supply, installation, and maintenance of state-of-the-art computing systems, storage servers and equipment

**6**

- Personalized software development, system automation and corporate application design.
- Digital solutions adapted for operational efficiency.

# Software Solutions

# Networking Services

7

- LAN/WAN design, firewall configuration, and wireless network configuration.
- Real-time monitoring, management, and support.

## 8

- Safe data storage, backup solutions, disaster recovery, and compliance management.
- Complete manipulation of the data life cycle with advanced security.

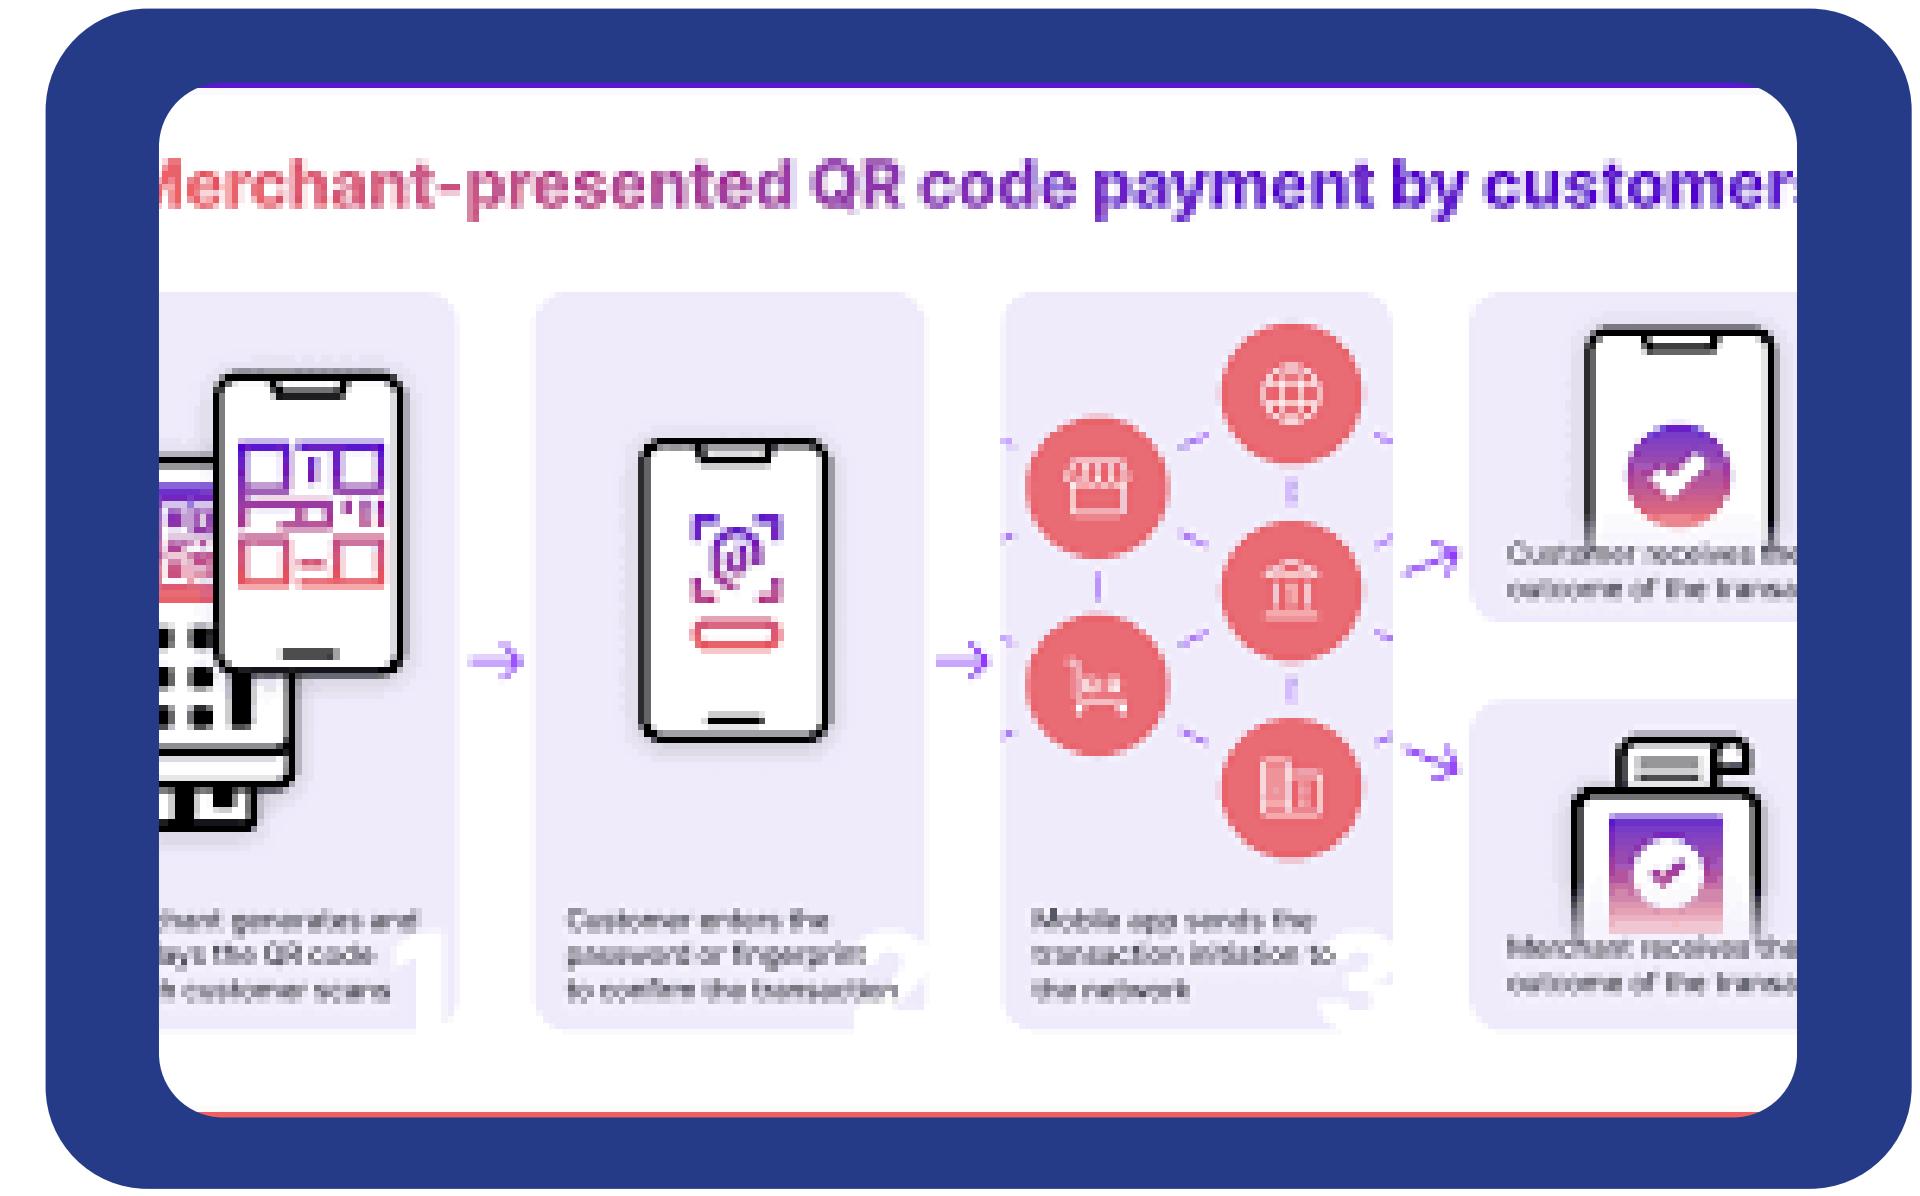

# Data Management

# QR-Based Mobile Applications

9

- Development of smart mobile applications with integrated QR code resources for
- Participation
- Inventory Management
- Access Control
- Asset Tracking

**10**

- Cloud infrastructure configuration (AWS, Azure, GCP), migration and cloud safety services.

# Cloud Computing

# Web Development

11

- **Web Development:** Corporate websites, e-commerce platforms, content management systems (CMS), and custom portals.

# IT Equipment Supply & Support

12

Reliable purchases, installation, and support services for a wide range of IT equipment

# PROJECT HIGHLIGHTS

## 1. SOIL MECHANICS & HYDRAULIC LABORATORY, RESEARCH DIVISION KARACHI

.Supply, Installation & Training of ADCP Rowetech USA with Hydro Boat Surfbee AUSTRALIA

## 2. DSS CENTER – SINDH RESILIENCE PROJECT, KARACHI

- Complete setup of a Decision Support System (DSS) Operational Room with Video Wall Solution, complete electric and fixture installation Server Room, Data Center Room
- Deployment of IT infrastructure supporting River Morphology Study and Flood Hazard Mapping.
- Real-time systems for disaster preparedness and management.

# PROJECT HIGHLIGHTS

## 3. DIRECTORATE GENERAL AGRICULTURE EXTENSION SINDH HYDERABAD

- Equipment supply, system integration, and end-user training.
- Enhanced digital capacity for crop development and agricultural operations.

## 4. ICT AGRICULTURE EXTENSION SERVICES – SINDH

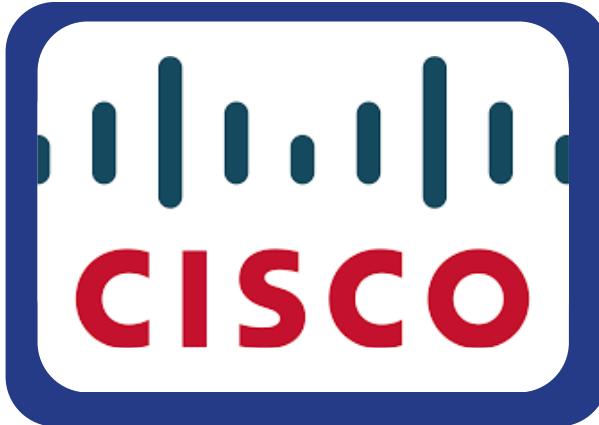

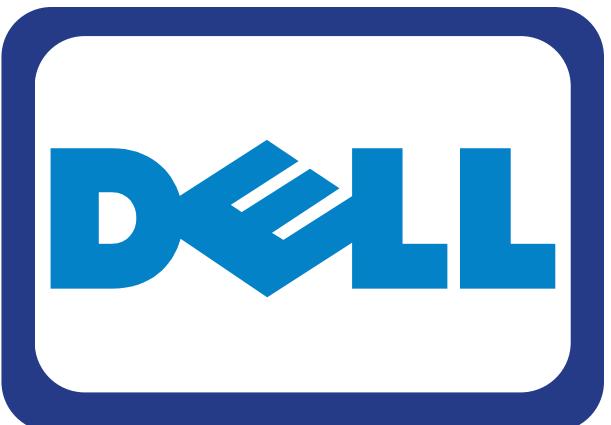

- Main ICT Center established at Hyderabad, serving as the hub and providing services ICT Agricultural Extension Call Center for effective measurable coordination between Agriculture Extension Experts and Farmers of Sindh.
- Sub-Centers deployed in Mirpur Khas, Larkano, and Sukkur, expanding digital outreach and support across the region.
